OO : Fertilizer and pesticide products and handlers regulated													
FERTILIZER AND PESTICIDE REGULATORY PROGRAM	3101000000												
Outcome Indicators													
1. Percentage of handlers and products monitored/inspected with detected violations		2%	2%	2%	2%	2%	1%	0.33%			0.7%	1%	In view of the full hiring of the field officers and with the provision of transport vehicles to the Field Units, it resulted to an organized and strengthened monitoring/inspection of FPA handlers and the fertilizer and pesticide products they sell. The increase in awareness and compliance of FPA handlers with the FPA rules and regulations contributed to the decrease in committed violations. A decrease in violations would mean a better image for FPA, indicating that it enhances its campaign on safe and judicious use of fertilizer and pesticide . There were a total of 11,986 visits to handlers and 47,130 products monitored and inspected nationwide as of second quarter of FY 2019. Out of the total 59,116 monitoring/inspections conducted, 387 violations were detected.
